

Barre District Office

Education ♦ Support ♦ Prevention ♦ Protection

Public health is about helping everyone to live long and healthy lives. We work to make the healthy choice the easy choice.

The Barre Office serves most towns in **Washington County** and some towns in **Orange County**.

Our goal is to protect the health of everyone in Vermont.

We provide many services. Mothers who need **help with food** can get help from the WIC program. To keep you well, we give **free shots** to those who cannot pay. Our office works closely with local doctors, schools and child care centers. This is just a short list of what we do.

How do you reach us?
