

## Planting a Riverside Park: Community Design Meeting

Hosted by the Vermont River Conservancy

Wednesday April 27<sup>th</sup> 5:45 – 6:45

Moretown Town Hall

Refreshments will be served

Vermont River Conservancy is a statewide land trust that protects special lands along rivers. We have a “Conservation Easement” that protects public access and ecological values on the Winooski river property (see map). We can plant trees and shrubs, improve trails, and install picnic tables and/or benches to improve the recreational and ecological value of this property.

***We are seeking your input to design the park! Please join us for an evening discussion:***

**1. Welcome & Introductions**

What is your connection to the property and river land? What do you think of it now, how do you presently use it, and what would you like it to be in the future?

**2. Community Design ideas**

We will present two draft designs as conversation starters. We will solicit input about what design elements are desired, and what community members want.

**3. Next steps:** Join us for the upcoming May tree planting or helping with long-term maintenance of the site. In the fall we will host a small celebration and walk the land.

The “Arthur Buck Park” on the Winooski River, across from the Highway Department and the landfill, at the Route 2 bridge.
